

3. Many named communities may have no separate postal code number or no separate town government, yet they appear on maps and bear tree names.

This article, then, is an appeal for input from ISA members. You know your state. Which of your towns have names of trees (English or any other language, especially in languages of Indian tribes in your area)? Please send your information to:

F.W. Holmes, 24 Berkshire Terrace, Amherst, Massachusetts 01002. And, if you would like my two lists for your state, send a #10 envelope bearing your name and address, plus \$1.00 (for postage and photocopying).

*Director, Shade Tree Laboratories  
University of Massachusetts  
Amherst, Massachusetts 01003*

## INDICES TO THIRTEEN YEARS OF ISA RESEARCH GRANTS

by Francis W. Holmes

The Memorial Research Trust of the International Society of Arboriculture supports research on tree care with grants. The projects are prioritized by a research committee of the ISA and selected by the trustees of the Memorial Research Trust. A major component in the selection procedure is the usefulness of the obtained data to the arborist. The Trust through 1987 had distributed funds to 132 projects. These cover a wide range of subjects and have been distributed to several states, provinces, institutions and scientists. The four indices that follow will illustrate the scope and distribution.

The number in the index that follows the subject or name refers to the number of the grant. These are listed in your 1987 ISA Yearbook beginning on page 27. Please refer to this yearbook for a more complete understanding of these indices.

### SUBJECT INDEX

Acclimatizing trees	53	Austrian pine, improvement of	90	Birch	31,34
Adapting to land-fill gas...		Backfill effects on roots	46	Birch, paper	
...role of mycorrhizae	114	Bacteria, xylem-related (oak scorch)	75	...defoliation stress vs. borers	123
Adaptability to poorly aerated soils	50	Bagworm populations	65	...moisture stress vs. borers	123
Air pollution	7, 35	Bark-beetles (elm)		...nutrient stress vs. borers	123
Anatomical effects	45	...attracted by pruning on wrong date	104	...resistance to bronze birch borer	123
Anti-viral compounds	44	...feeding on elms	79	Borers	31, 34, 42
Arborist practices (I.P.M.)	71	Barrier zones (re vascular cambium)	73	...apple flat-headed, in maple, control	111
Apple scab control	100	Baskets, wire, effects on tree growth	113	...bronze birch, resistance in paper	
Apple tree borer, flat-headed...		Benefits of trees	7	...birch	123
...control of	111	Benomyl	2	...entomogenous nematodes against	129
Arid environment	110	Beta-glucoside level/microbial ecology...		...two-lined chestnut, prediction in	
<i>Armillaria mellea</i> ...		...of salt-injured sugar maples	91	...oaks	130
...rhizomorph development	97	Biochemical effects	45	Branch dieback, of dogwood	69
Ash, remedy for chlorosis	98	Biological controls	61, 66	<i>Bursaphelenchus lignicolus</i>	51

Cambium, vascular (re barrier zones)	73	Education, to prevent construction		...of iron sulfate into pin oaks	85
Canker, Thyronectria, of honeylocust	76	...damage	117	...spile design	96
...from high temperature under summer		Electricity	3	Insecticides	26, 31
...wrap	108	Elm	2, 79	Insects, Insect pests	24, 26, 31, 32
Canopy radius, to predict root spread	127	...American, resistance to		...initial occurrence of (phenology)	87
Carbohydrate reserves		...DED & EPN	102	...seasonal development of	
...tree vigor & borer attack prediction	130	...chloropicrin in: systemic fungicide	92	...(phenology)	99
<i>Ceratocystis ulmi</i>	79, 102	...leaf beetle nutrition, re density	101	Integrated pest management, arborists	71
Chloropicrin...		...pruning of, re bark beetle attraction	104	IPM	71, 100
...as systemic fungicide in elm	92	...resistant to DED and EPN	102	Iron deficiency	13, 57
Chlorosis	57	...Siberian, elm leaf beetle on	101	...iron sulfate injection to control	85
...of ornamental ash, remedy for	98	Environment	34	...resistance to	119
...of pin oak, iron sulfate treatment	85	...arid	110	Landfill gas	
Choice, characteristics, suitability...		...street tree-	106	...role of mycorrhizae in adapting to	114
...for landscaping	16, 20, 21, 25, 35, 38	...urban	106	Landscaping, new trees for	81
...for storm-resistance	72	...urban, re root pathogens	116	Light effects	9
...for street trees	40	Epidemiology	41, 43, 56	Lilac borer	61
Clones...		...of oak dieback	74	Linden, Greenspire	64
...of honeylocust, vs. mimosa		Ethane	39	Locust, Honey- (see Honeylocust)	
...webworm	88	Etiology	41, 52	<i>Lymantria dispar</i>	66
Control—see Disease..., Insect...		...of dogwood branch dieback	69	Management	4, 5
Compaction of soil, how to reduce	82	Fertilizer...		...program, root-system development	
Computer system (diagnosis)	55	...type & level, re <i>Verticillium</i> wilt	125	...in	118
Conductance, hydraulic, of roots	132	Fertilizing	13, 23, 28	Manganese deficiency	48
Conifers	60	Fill (backfill)	46	Maple(s)	29, 41, 48
Construction damage, education to		Frangipan soil...		...nursery-grown, borer host/stress	
...prevent	117	...tree roots in, after vertical mulching	120	...relation	111
Container dimensions (street trees)	80	Fumigants, to control decay	67	Maple, Norway	
Containers, water for trees in	80	Fungi, fungal diseases	2, 6, 11, 15, 24	...rootstock resistant to <i>Verticillium</i>	128
<i>Cornus florida</i> :		Fungicides	2, 6	Maple, sugar...	
...branch dieback of	69	...for disease prevention on shade		...salt injury & microbial ecology of	91
...response to moisture stress	77	...trees	103	Methods	1, 13, 24
<i>Cornus nuttalli</i> , anthracnose of	52	...systemic, chloropicrin as, in elm	92	Microbial ecology...	
Crown of tree, water stress	121	Gas, landfill; role of mycorrhizae	114	...of salt-injured sugar maples	91
<i>Crypthopalum</i> sp.	66	Girdling	19, 22	Midge, pod-gall, of honeylocust	86
Curriculum for safety training,		Girth, to predict root spread	127	Mimosa webworm, on honeylocust	88
...arborists	107	Greenspire linden	64	Miticides	26
<i>Cytospora</i>	15, 27	Growth	9, 16, 19, 23, 30	Moisture [see also Water(ing)]	
Dates for pruning elms	104	...acceleration by mycorrhizae	78	Moisture	
Decay:	37, 54	...regulators	49	...demands in arid environment	110
...barrier zones against	73	...retardants, evaluation of new	115	...stress of flowering dogwood	77
...control by injected fumigants	67	...street-tree, per site factors	106	...stress of honeylocust	
...(heartwood) external indicators	68	...transplanting success influenced		...(re <i>Thyronectria</i> )	76
Decline	29, 41, 62	...by	126	Mulching, vertical, in frangipan soils	120
Deficiencies	13, 24, 48	...water-stress influence on	121	Mulches, common types, re tree	
Defoliation	12	...wire-basket influence on	113, 124	...establishment	131
...of birch, paper: re borer resistance	123	Gypsy moth	66	Mycorrhizae	47, 78
...of oak, red: re physiology	122	Herbicides	4, 19, 58	...role in adaptation to landfill gas	114
Deterioration	54	Herbicide-treated soils...		Mycoplasma, resistance to	102
Diagnosis	55	...barriers to exclude roots	95	Nematode(s), entomogenous	61
Dieback:		Herbivore performance...		...effectiveness vs. tree-boring	
...of dogwood	69	...on red oak: water deficit &		...insects	129
...of oak	74	...defoliation	122	Nematode(s), pinewood	51
Disease control	43, 44, 52, 54, 56, 62	Honeylocust	43	<i>Neoplectana carpocapsae</i>	61
Dogwood, Pacific...		...clones, vs. mimosa webworm	88	<i>Neoplectana biblionis</i>	61
...anthracnose, etiology & control	52	... <i>Thyronectria</i> canker of	76	Nitrogen	28, 36
Dogwood, Flowering...		...moisture stress of	76	Nursery practices	12, 16
...branch dieback, etiology & control	69	...pod-gall midge	86	Nutrient stress	
...moisture stress	77	Hormones	49	...in birch, paper: re bronze birch	
Dormant pruning	63, 84	Hydraulic conductance, of roots	132	...borer	123
Drought		Identification of		Nutrition	13, 23, 24, 28, 36
...intolerance in seedlings	112	...root pathogens	116	Oak	32
...tolerant rootstocks	83	Indicators...		...carbohydrate reserve, re vigor	130
Dutch elm disease	2, 79	...external (of heartwood decay)	68	...dieback, epidemiology & control	74
...resistance toward	102	Injection	1, 24, 67	...scorch, xylem-limited bacteria	75

- ...two-lined chestnut borer attacks 130
